

## **Douglas P. Colbreth**

Doug and his wife Margaret are Co-Founders of MedCircle, and longtime philanthropists in the field of mental health. In 2002 they established the Colbeth Clinic in Chicago to provide mental health treatment services for primarily inner-city children. This state-of-the-art outpatient clinic has served thousands of children from the ages of four to eighteen.

Doug has been a successful entrepreneur in the high technology space. His two ventures (Spyglass and Kinaxis) became publicly traded companies with multi-billion dollar enterprise valuations. The success of these two companies has enabled the Colbeth Family to become significant supporters of various mental health and veterans organizations.

The Colbeths formed MedCircle to help address a major problem facing our society. Access to mental health expertise is far too difficult and costly. The Colbeths believe a combination of Internet and artificial intelligence technologies can be leveraged to help bring the expertise of mental health experts to the public in an easy-to-access and affordable manner.
